Malayan High School of Science
Malayan High School of Science (MHSS) lays down the very foundation of the young’s scientific knowledge. With its internationally benchmarked curricula designed by first-rate faculty and delivered through IT-enhanced instruction in top-of-the-line facilities, MHSS delivers to the Filipino youth the same high-quality education that its mother school Mapúa Institute of Technology is known for. This not only enables students to think scientifically and to be adept with scientific methods but develops in them a deep appreciation for the arts as well. MHSS’s advanced instruction is further enhanced with the exclusive access to SAS Curriculum Pathways, an online curriculum resource for the core disciplines of science, English language arts, social studies, and mathematics, and with subscriptions to Science Direct and Britannica Online for its students’ supply of scientific and general knowledge articles. All these advantages can be enjoyed by students in an environment that is safe and susceptible to holistic development through the Safe School Program. With the MHSS education, students are molded to be imaginative and critical thinkers to create ideas that may bring about the next best things.
